

WE CREATE **SOLUTIONS.**

Sealing technology | Sliding bearing technology | Engineering Solutions

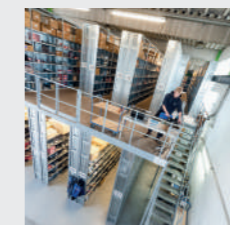

SMALL

CAN BE

BIG TOO.

Isn't it time to rethink the way you do things? To have a supplier that can be quicker, more flexible and more powerful? We provide top-quality products and services that are perfectly tailored to your requirements.

Markets are currently experiencing a huge amount of change, both nationally and globally. New technologies. Difficult challenges. Boundaries are shifting. New opportunities are emerging. It's time for a partner who's ready to give everything to ensure your success. It's time for the Best Partner.

IT'S TIME FOR CHANGE.

SOLUTIONS

AS INDIVIDUAL AS THE CHALLENGES YOU FACE.

At ttv, we've been working with sliding bearings and seals for 30 years. As one of the first companies of our kind, we were making connections in Asia as far back as the late 80s. Characterised by trust and respect. And an unwavering commitment to individual, customer-specific solutions.

Why not benefit from this potential for success yourself?

PERFORMANCE CONNECTS.

Our team is made up of over 25 highly qualified specialists. We are determined to achieve more for you. As a single unit, we can move quickly on the market and can develop solutions for you we're sure you'll be delighted with. Whether you're thinking about costs or service life. Quality or deadline.

Put your trust in our team.

SLIDING BEARINGS

EXACTLY AS THEY SHOULD BE.

Sliding bearings are our life. We have been offering superior solutions since 1990. With all types of sliding bearing. For longer service lives. An improved cost situation. And better quality. We know our way around all the relevant sectors. Drive technology, the agricultural industry and the forestry sector – we can do it all. Mechanical engineering, the automotive industry and the road construction sector – we're right at home. Other industries – our bread and butter.

ENGINEERING SOLUTIONS.

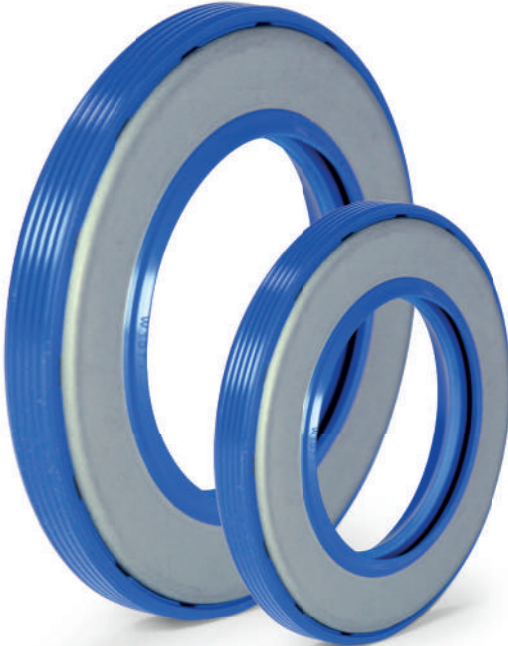

“Made in Germany” engineering ingenuity. There’s no better way to describe our additional capabilities. Customer-specific solutions, developed by ttv. Excellent understanding of materials. Physical expertise. Industry experience. That’s why no requirements are too demanding for us.

[Get our Task Force on board now.](#)

Seals help to secure even the most complex of functions. They're the tiny detail. With a huge importance. We provide solutions. Created through experience and competence. That's why every single sealing ring is something really special to us. Static, dynamic, hydraulic. For use as a standard-compliant component, held in stock in vast quantities or in a customised design based on drawings.

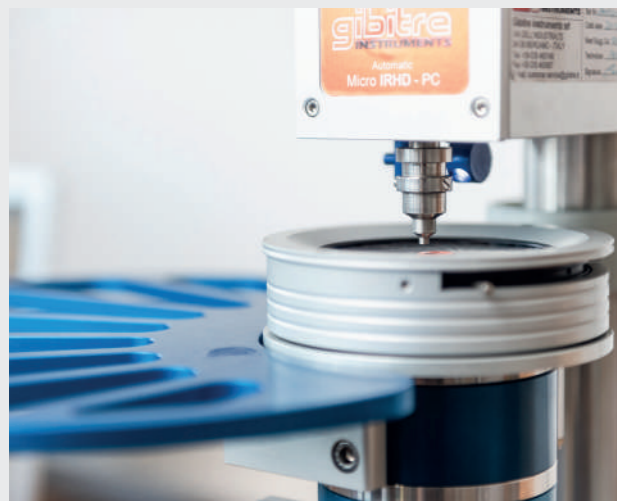

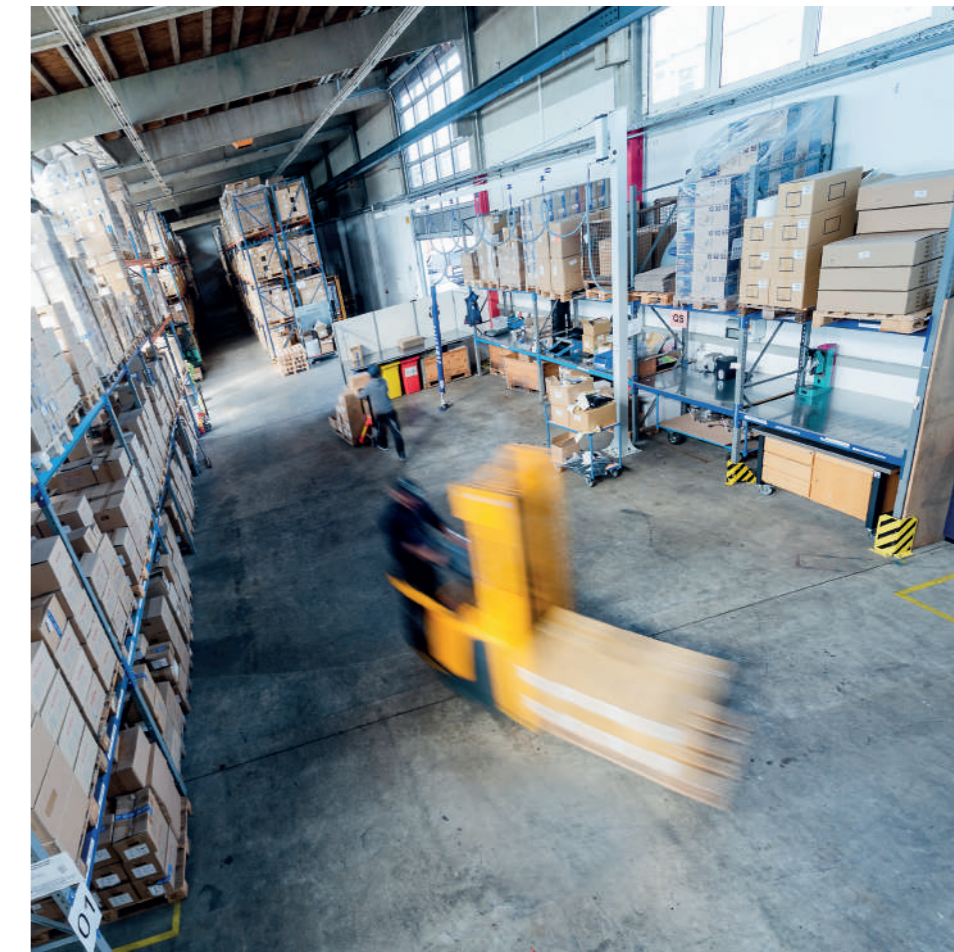

THAT KEEP THEIR PROMISE.

ENGINEERING SOLUTIONS.

Customer-specific solutions. For every required sealing ring. Individually developed with complex laboratory testing. Verifiably suitable for series production. Temperature-resistant, good friction properties, long service life? Optimisations in the high double-digits? We can make it happen.

Our engineers are ready to help.

If you want both, you have to offer both. With a huge logistics centre for standard-compliant standard products and customised products on demand. With highly efficient logistical processes. And as your extended workbench for every conceivable additional service. Customer-specific labelling, module assembly. Spare parts supply and Kanban.

Just get in touch.

LOGISTICS

WITH EXTRA PERFORMANCE.

QUALITY

IS ALWAYS NON-NEGOTIABLE.

Best prices or maximum service life? Not a problem. Higher temperatures? Sure! Quality is always an essential prerequisite. For every single optimisation, without compromise. We've been making sure of it - for 30 years.

With Statistical Process Control (SPC), Failure Mode and Effects Analysis (FMEA), Production Part Approval Processes (PPAP) and the guaranteeing of ppm values. And with the latest testing and measuring machines.
